**Subject: Peraclean 15%: EPA Reg. No. 54289-4  
Amendment Dated 11/12/04**

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, to provide a revised label which adds the "Me Too" use for treating process waters used for washing raw, unprocessed, post-harvest fruits and vegetables against non-public health spoilage/decay organisms, and which makes minor typographic corrections, is acceptable with the comment below, and providing you submit three final printed labels within 60 days from the date of this letter which makes the following changes.

**Comment**

When used to control non-public health spoilage/decay organisms in post-harvest fruits and vegetables, using the basic formula at the label dose produces ppm concentrations of the actives and inert ingredients at concentrations which do not exceed established tolerances listed in 40 CFR Part 180.940.

**Page 4/7**

In the continuous/intermittent section, correct the "20 ppm" to "7 ppm" in the fragment "...do not exceed 20 ppm...", and also correct "730 ppm" to "750 ppm" in the fragment "...do not exceed 730 ppm...".

**Please include a copy of this letter with your re-submission.**

If you have any questions about the comments in this letter, please feel free to contact Tony Kish at 703-308-9443, or myself at 703-308-6341.

Sincerely,

Marshall Swindell,
